See note 6

NOTES:
1. Customer facilities shall comply with Company Standards, the NEC, and authorities having jurisdiction.
2. The pole shall be a minimum diameter of 6" round or 6" X 6" square.
3. Additional pole height may be required to maintain proper clearance per Section 7.3.
4. For 277/480 volt service, Customer shall furnish and install a Company approved lockable, non fused disconnect switch on the supply side of the meter base and a separate load side disconnect with overcurrent protection within 2 ft. of the meter.
5. Company shall control the supply side disconnect and it shall be available to Company 24 hours a day without notice.
6. Customer installs pole, conduits, conductors sized per NEC, bonding, grounds, neutrals, attachments, and weatherproof service entrance equipment.
7. Customer installed minimum 1/2" galvanized eye bolt with 2" x 2" square washer recommended or other suitable attachment.
8. If the conduit between the meter socket and the main disconnect is not metal, a bonding ground is required.
9. Point of attachment shall be either accessible to Company's bucket truck or have enough surface (such as wall or building structure) and sufficient ground space on same Customer's property to safely support a ladder.
10. Physical location of pole and any additional guying or bracing will be approved by the Company. See drawing D2-1.
