

## 2021 ENTERGY GREEN POWER OPTION PROSPECTIVE PRODUCT CONTENT LABEL<sup>1</sup>

Entergy's Green Power Option is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, [www.green-e.org/rec](http://www.green-e.org/rec).

Entergy's Green Power Option matches 25%, 50% or 100% of your electricity usage. In 2021, Entergy's Green Power Option will be made up of the following renewable resources.

Green-e Energy Certified New <sup>2</sup> Renewables in Entergy's Green Power Option. (Actual name may change with marketing and branding. This is what's referenced in the filing)		Generation Location
-Biomass	%	
-Geothermal	%	
-Hydroelectric <sup>3</sup>	%	
-Solar	100%	LA
-Wind	%	
TOTAL	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the RECs you purchased. These figures reflect the resource mix of the RECs delivered to Entergy's Green Power Option in 2021.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e Energy.

For comparison, the current average mix of energy resources as of 2020 supplying Entergy New Orleans includes: Coal (1%), Natural Gas (56%), Nuclear (34%), Hydroelectric (<1%), and Solar (<1%). The remaining balance is made up through market purchases (~9%).

The average home in Entergy New Orleans uses 1064 kWh per month. Source: Entergy New Orleans, 2019
